Beavers Curriculum Intent

Respect – Honesty – Determination – Cooperation – Equality – Kindness

Beavers will, without excuse or compromise, provide the best start to life for all of the children in its care.

We aim to provide a challenging, high-quality computing curriculum that equips children to use computational thinking and creativity to confidently solve problems and become respectful, responsible and safe users of technology. This involves having exciting, practical, experiences which encourages children's curiosity towards a variety of topics in computing and the wider curriculum. We want to ensure that pupils become digitally literate and are able to use technology to express themselves, developing their ideas through computing. We want to provide children with the skills which can be applied to our ever changing modern working world and equip them with the knowledge to make a positive impact on society and the environment.
